*Optician*

**Arthur:** Of course we have not made a bad sale of the shop, Georgina. It was a good price. What do you mean, I still go there all the time! Georgina, that's not true. I go two or three times a week in the afternoon. You know I like to advise my successor. He has only just qualified as an optician and glasses manufacturer. He is just starting. He still has a lot to learn about selling glasses!

For example, did you know, Georgina that an optician can test a customer's eyesight before helping him choose between many different possibilities: fine or thick lenses, bifocals or not, smoked or antireflective, unbreakable, with plastic or metal frames, as well as hard or supple contact lenses. You are not listening to me, Georgina. I know I bore you when I talk about cutting glasses, their different frames and quality. Where are your binoculars? You want to look out of the window again, don't you? You already spent 2 hours there this morning. And you never listen to what I say, Georgina!

*In the same area of work, Arthur Spectacle could also be: **orthopaedic surgeon – speech therapist – dental technician...***

**A few words relating to an optician's work:**

*Here is a text using a lot of words from the list. Read it carefully, as you will have to use the same words afterwards.*

Bifocals	Case	Contact lenses
